📱 +43 660 502 4795 | 🌍 Available for immediate relocation to Greece

PROFESSIONAL SUMMARY

SOC Level 1 trained cybersecurity professional ready for Security Operations Center roles. Completed comprehensive TryHackMe SOC training (100% complete) with proven incident response, malware analysis, and threat hunting capabilities. Officially assessed as "Datensicherheitsspezialist" by Vienna's BEST Institut. Brings unique analytical methodology from classical music background with strong technical foundation. Available for 24/7 shift work and immediate start.

KEY QUALIFICATIONS

✅ SOC Level 1 Path - 100% Complete (TryHackMe)
✅ Top 2% Global Ranking - 155+ completed security challenges
✅ Official Cybersecurity Assessment - "sehr gute Kenntnisse" rating
✅ Ready for SAL1 Professional Certification
✅ Bilingual: Greek (Native) + English (Fluent)
✅ EU Citizen - No visa requirements

SOC ANALYST CORE COMPETENCIES

Incident Response & Investigation
• Email forensics and phishing analysis
• Malware investigation and reverse engineering
• Network traffic analysis and threat hunting
• PowerShell forensics and Windows log analysis
• Multi-stage attack chain reconstruction
• Professional incident documentation and reporting

Security Monitoring & Analysis
• SIEM operations and log correlation
• Real-time threat detection and alerting
• IOC analysis and threat intelligence integration
• Network anomaly detection
• Endpoint security monitoring
• DNS tunneling and data exfiltration detection

Technical Tools Proficiency
• Network Analysis: Wireshark, tshark, Nmap, Snort
• Malware Analysis: Volatility, KAPE, Redline, Inkparse
• Log Analysis: Splunk, ELK stack, PowerShell forensics
• OSINT: Advanced web research, source verification
• Programming: Python, Bash, PowerShell scripting

PROVEN TRACK RECORD - TECHNICAL ACHIEVEMENTS

🎯 Advanced Incident Response Portfolio
• Boogeyman 1: Complete DNS exfiltration recovery and PowerShell forensics
• Boogeyman 2: Advanced memory forensics and spear phishing investigation
• Boogeyman 3: Multi-stage APT attack reconstruction using Windows Event Logs
• Professional writeups demonstrating SOC analyst methodology

🔍 Security Projects & Automation
• Domain Analyzer: Automated OSINT and threat intelligence tool
• Vuln-Report-AI: Vulnerability assessment with automated reporting
• PCAP Analysis Portfolio: Network forensics and traffic investigation
• Brute-Force Detector: Real-time security monitoring system

CYBERSECURITY EDUCATION & CERTIFICATIONS

Professional Certifications
• Security Analyst Level 1 (SAL1) - Ready for exam
• CompTIA Security+ - In progress (Target: December 2025)

Official Assessment
• BEST Institut Vienna - "Datensicherheitsspezialist" with "sehr gute Kenntnisse"

Specialized Training
• TryHackMe SOC Level 1 Path ✅ 100% Complete
• Advanced Endpoint Investigations (In Progress)
• MITRE ATT&CK Framework
• NIST Cybersecurity Framework

WORK AUTHORIZATION & AVAILABILITY
• EU Citizen (Greek passport) - No visa requirements
• Established residence in both Austria and Greece - immediate start available
• No relocation assistance required - ready for seamless transition
• Flexible for 24/7 shift work and weekend coverage
• Strong communication skills in Greek and English
• Experience working in international, multicultural environments

EDUCATION BACKGROUND

Technical Foundation
• Diploma, Electronics, Computer & Network Technology | TEE Athens | 1998-2002
• Strong foundation in networking, systems, and technical troubleshooting

Advanced Education
• Master Artium, Guitar Performance | University Mozarteum Salzburg | 2006-2010
• Developed analytical thinking, pattern recognition, and systematic problem-solving

PROFESSIONAL EXPERIENCE

Technical & Analytical Background | 2010 - Present
• Applied systematic analytical approach to complex problem-solving
• Developed pattern recognition skills and attention to detail
• Demonstrated ability to work under pressure and meet deadlines
• International collaboration and multicultural team experience
• Continuous learning and professional development mindset

WHY CHOOSE ME FOR YOUR SOC TEAM

🎯 Proven Technical Competency
• 100% SOC Level 1 completion demonstrates comprehensive skills
• Top 2% global ranking shows exceptional dedication and capability
• Official professional assessment validates technical knowledge

🌟 Unique Analytical Approach
• Systematic methodology from classical music training
• Pattern recognition and anomaly detection skills
• Creative problem-solving under pressure
• Meticulous attention to detail

🚀 Ready for Immediate Impact
• Complete foundational SOC training
• Hands-on experience with real-world scenarios
• Professional incident response methodology
• Ready for 24/7 operations and shift work

🌍 Cultural & Language Advantages
• Native Greek speaker with English fluency
• Understanding of Greek business culture
• EU mobility and work authorization
• International perspective and adaptability

AVAILABILITY
• Immediate start available
• Open to relocation anywhere in Greece
• Flexible scheduling including nights, weekends, holidays
• Committed to long-term career development in cybersecurity

LANGUAGES
• Greek: Native
• English: Fluent (Technical and Business)
• German: Good
